

IT Training Courses

Company: Substring Technologies

Trainer: Durgesh Tiwari

Full Stack Web Development – This course teaches how to build complete web applications using technologies like HTML, CSS, JavaScript, React, Node.js, and databases. Students learn both frontend and backend development, API creation, authentication, and deployment. It is ideal for beginners who want to become professional web developers. Price: \$120. Discount: 20%.

Python Programming for Beginners – This course introduces Python programming from scratch, covering variables, loops, functions, object-oriented programming, and basic data structures. It also includes small projects like automation scripts and simple applications to help learners understand real-world use cases. Price: \$80. Discount: 15%.

Data Science and Machine Learning – This course focuses on data analysis, visualization, and machine learning techniques using Python libraries such as Pandas, NumPy, Matplotlib, and Scikit-learn. Students will work with real datasets and build predictive models. Price: \$150. Discount: 25%.

Cloud Computing with AWS – This course teaches the fundamentals of cloud computing using Amazon Web Services. It covers services like EC2, S3, RDS, Lambda, and deployment strategies. Students learn how to design scalable and secure cloud applications. Price: \$140. Discount: 20%.

Cybersecurity Fundamentals – This course introduces the core concepts of cybersecurity, including network security, encryption, ethical hacking basics, and threat detection. It helps learners understand how to protect systems and data from cyber attacks. Price: \$110. Discount: 18%.

Mobile App Development with React Native – This course teaches how to build cross-platform mobile applications for Android and iOS using React Native. It includes UI design, API integration, state management, and publishing apps to app stores. Price: \$130. Discount: 22%.

DevOps and CI/CD Automation – This course focuses on modern DevOps practices, including Docker, Kubernetes, Jenkins, GitHub Actions, and continuous integration and deployment pipelines. Students learn how to automate software delivery and infrastructure management. Price: \$160. Discount: 30%.

Database Management with SQL and PostgreSQL – This course teaches how to design, manage, and query relational databases using SQL and PostgreSQL. Topics include database normalization, indexing, joins, transactions, and performance optimization. Price: \$90. Discount: 15%.

Artificial Intelligence Fundamentals – This course provides an introduction to AI concepts such as neural networks, natural language processing, and computer vision. Students learn how AI systems are built and how they are applied in real-world applications. Price: \$170. Discount: 25%.

Frontend Development with React – This course focuses on building modern user interfaces using React. It covers components, hooks, state management, routing, performance optimization, and integrating APIs to create dynamic web applications. Price: \$100. Discount: 20%.
